Meeting Agenda

- User Testing Feedback and Final Adjustments

Discussion Points:

- **User Testing Insights:** Idris summarized the feedback from user testing, highlighting the positive reception of the traffic conditions feature and suggestions for improving the review submission process.
- **Final Adjustments:** Based on user feedback, Lina proposed minor adjustments to the UI for the review system, including clearer rating instructions and a more intuitive review submission flow.
- **Feature Completion:** Atai confirmed that both features are nearing completion, with all major development tasks finished and final adjustments underway.

Next Steps:

- **Implement UI Adjustments:** Lina to quickly implement the suggested UI changes based on user feedback.
- **Final Testing:** Mamadou to coordinate a final round of testing, ensuring all adjustments are correctly implemented and both features function as expected.
- **Prep for presentation:** Shanvin to prepare the PowerPoint for the upcoming final presentation, ensuring smooth presentation of the new features.
