

Meeting Minutes Sprint 4 Meeting 1

FC-soen341projectW2024

Date: March 26, 2024

Duration: 2.5 hours

Meeting Mode: Online

Members Present:

- Atai
- Michael Shokralla
- Mamadou
- Idris
- Lina Taalba
- Shanvin Luo

Online 9PM

Meeting Agenda

- Introduction to Sprint 4 Features: Traffic Conditions and Review System

Discussion Points:

- **Feature Overview:** Atai presented an overview of the sprint's goals, focusing on two main user stories: traffic conditions awareness (US-11) and a review/rating system at checkout (US-10).
- **Technical Requirements:** Michael outlined the technical requirements for implementing the Traffic Conditions API and discussed potential data sources and API providers.
- **Interface Design:** Lina proposed design mockups for displaying traffic conditions in the navbar and sketched initial concepts for the rating and review system at checkout.

Next Steps:

- **API Research:** Mamadou and Idris to research and select a suitable Traffic Conditions API, considering reliability, cost, and ease of integration.
- **UI Prototyping:** Lina to develop detailed UI prototypes for both features, focusing on user experience and integration with the existing system.
- **Technical Spike:** Shanvin to conduct a technical spike on integrating user reviews and ratings, exploring database schema and backend logic needed.
